1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kanno (US2002/0151229 A1). Kanno discloses the claimed structure including a small watercraft 10 with a four cycle engine 12, an engine speed sensor 77, a hydraulic-pressure sensor 170, an alarm 174, 176, a hydraulic pressure detecting portion 178, 184 to detect whether or not the pressure of the oil obtained from the hydraulic-pressure sensor is not more than a predetermined threshold, when detecting that the engine speed obtained from the engine speed sensor is within a predetermined range (note also Figure 12).
- 3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kanno ('651) shows a fuel injection control. Kanno ('820) shows a control.
